SUMMARY

Machine learning researcher with three years of academic experience building and evaluating deep-learning systems, plus professional full-stack web and mobile development experience.

SKILLS

Languages & tools	Python, TypeScript, C#, Node, React, PyTorch, TensorFlow
Machine learning	Computer vision, foundation models, multiple-instance learning, model evaluation
Systems & cloud	Linux, Git, AWS, GitHub Actions, SLURM, Singularity

EXPERIENCE

Research Assistant | AI in Medicine Lab, UBC Jul 2023 – Oct 2026

- Developed end-to-end PyTorch multiple-instance learning pipelines for pathology slide images with focuses on cohort shift, label stability, and task calibration.
- MSI screening strategy with 94% sensitivity and 98% NPV in multi-institutional external validation.
- Built reproducible training and evaluation workflows using Singularity and SLURM on GPU clusters.

Clinical ML Research Intern | St. Paul's Hospital Jan 2024 – Aug 2024

- Proposed an AI screening framework for pacemaker lead extractions using clinical CT.
- Coordinated work with cardiac surgeons and presented at the UBC SBME Symposium.

Software Developer | Stafits Nov 2017 – Oct 2018

- Developed full-stack web and mobile applications using MongoDB, Express, React and Node.js; deployed backend services on AWS.

Please see the portfolio website for further work history, research, and projects

EDUCATION

Master of Applied Science, Biomedical Engineering | University of British Columbia Expected Oct 2026

Grade: 93.2% | NSERC MUSIC Scholarship (\$18,000); CANTRAIN Master's Studentship (\$17,500)

Honours Bachelor of Science, Biology | York University May 2022

First Class Standing; Dean's Honour Roll
